Tehran Province, Iran

Summary

With a degree in Applied Mathematics - Cryptography and Digital Signature from Amirkabir University of Technology (Tehran Polytechnic), I bring a strong academic foundation in encryption algorithms and secure communications. I am the Co-founder of Nahankav, a cybersecurity consulting firm, where I've served as a Cybersecurity Consultant for over two years, delivering tailored security solutions to a range of clients, including MTN and MohandesPishegan Co. In parallel, I serve as the Cybersecurity Manager at Golrang Industrial Group, one of Iran's largest manufacturing conglomerates, where I lead a team of engineers and analysts to protect enterprise assets and drive cybersecurity maturity. I hold multiple professional certifications, including CISSP, CISM, and ISO/IEC 27001:2022 Lead Auditor, reflecting my deep expertise in areas such as penetration testing, red teaming, threat hunting, vulnerability management, risk assessment, and mitigation, as well as custom cryptographic solutions. Some highlights of my recent work include improving user retention by 25% through enhanced security measures and designing a custom-built encryption algorithm for specialized use cases. I am deeply passionate about cybersecurity and committed to continuous learning. My mission is to help organizations strengthen their security posture, build resilient SOCs, and contribute to the growth and innovation of the cybersecurity ecosystem in Iran and beyond.

Experience

TestKav

Founder

September 2025 - Present (11 months)

Tehran Province, Iran

Nahankav

10 years 5 months

Chief Executive Officer

June 2023 - Present (3 years 2 months)

Tehran Province, Iran

Co-Founder

March 2016 - Present (10 years 5 months)

Tehran, Iran

Golrang Industrial Group
